

CASO®
DESIGN

THE NEW GENERATION OF MICROWAVES

CASO Designer Serie

CERAMIC

With the **CASO microwave designer serie CERAMIC** you will experience the next generation of multifunctional all-rounders. In addition to the appealing, high-quality design, the devices from CASO convince with perfect technology and intuitive operation. Unique in the market is the use of the innovative ceramic floor with microwave reflector and thus the abandonment of a classic turntable. Compared to classic microwaves with turntables, this generation of devices offers many advantages.

CERAMIC
with innovative
ceramic-reflector floor:

Classic microwaves
with turntables:

Also suitable for oval and angular vessel

Just for round plates

Both oval and square dishes are perfect to use in the CERAMIC microwave oven (i.e. casseroles or cake trays)

Cooking on two levels

Thanks to the innovative rack grate it is possible to cook and heat comfortably in a microwave on two levels at the same time.

+ CERAMIC

Perfect cooking results!

— Classic microwaves

The innovative ceramic floor ensures an even distribution of the microwaves, so that the food is cooked perfectly from all sides.

Same useful volume in a compact size

20 liter microwave with CERAMIC floor

30 liter microwave with turntable

Due to the ceramic reflector floor, the size of the usable microwave dishes is no longer limited to the diameter of the turntable. The usable area is thus up to 60% larger than comparable devices with turntables - with the same, compact external dimensions. Therefore a 20 liter CERAMIC microwave oven has the same useful capacity as a classic 30 liter appliance.

Easy cleaning

Easy cleaning of the CERAMIC floor
